

SFY2022 – SFY2023 EVALUATION SUMMARY: EXTRA LARGE RCOs

EVALUATION PURPOSE

- An initial evaluation of state-funded peer recovery support services (PRSS) was conducted using data from SFY2021. Results from those analyses served as a baseline for future evaluations and indicated that PRSS and other activities facilitated by the RCOs were effective in increasing recovery capital.
- Analyses showed that the most common PRSS associated with increased recovery capital include the following:
 - Attending a higher number of total meetings
 - Attending a higher number of prosocial activities
 - Attending a higher number of advocacy activities
 - Completing recovery plan goals
- After the initial evaluation, a set of recommendations was implemented by BDAS and the FO. These recommendations aimed to improve data collection processes and increase BARC-10 completion rates. The RCO directors were also tasked with encouraging participants to attend more meetings, prosocial activities, and advocacy activities.
- The goal of this report is to compare SFY2022 and SFY2023 data and to determine if key metrics identified in the SFY2021 evaluation are still associated with increased recovery capital and to summarize differences in key metrics after the implementation of SFY2021 recommendations.
- To accurately compare key metrics at each RCO, the RCOs have been aggregated into four categories (small, medium, large, and extra-large) based on the average number of unique (i.e., unduplicated) participants at each RCO. This report shows a comparison of extra-large RCOs, which have an average of greater than 301 participants for each SFY.

BARC-10 ANALYSIS

- **Figure 1** shows the average BARC-10 scores for each of the three extra-large RCOs by year.
- Both Hope for New Hampshire Recovery (1.3 points) and Revive Recovery Resource Center (0.9 points) had an increased average BARC-10 scores from SFY2022 to SFY2023.

Figure 1. Average BARC-10 scores by year, SFY2022–SFY2023

- SOS Recovery had an average decrease of 1.9 points.
- Beginning in January 2023, the FO implemented a contractual requirement for all RCOs which required a monthly BARC-10 completion rate of at least 30%. **Figure 2** shows the BARC-10 completion rates by quarter for each of the extra-large RCOs.
- Hope for New Hampshire Recovery met the required completion rate (30%) in SFY2023 Q3 and Q4.
- Revive Recovery Resource Center exceeded the required completion rate (30%) in every quarter.
- SOS Recovery exceeded the required completion rate (30%) in SFY2022 Q3 and every quarter in SFY2023.

PEER RECOVERY SUPPORT SERVICES

- Analyses indicate that increased attendance and active participation in PRSS are the two most important PRSS associated with increasing recovery capital.
- The following PRSS were most commonly associated with increased recovery capital:
 - Attending an increased number of total meetings, prosocial meetings, educational meetings, and advocacy meetings
 - Having an increased number of completed and active recovery plan goals

COMPARISON OF ACTIVITIES FROM SFY2022 TO SFY2023

PROSOCIAL ACTIVITIES

- Only one of the extra-large sized RCOs provided an increased number of prosocial activities from SFY2022 to SFY2023 (**Figure 3**).

Hope for New Hampshire Recovery had a 2,011.6% increase in the number of prosocial activities from SFY2022 to SFY2023. This is the largest increase in the number of prosocial activities of all RCOs.

- However, Revive Recovery Resource Center, which is the smallest of the extra-large RCOs, provided over 1,400 prosocial activities in SFY2023.
- Although they provided fewer prosocial activities in SFY2023, SOS Recovery still provided over 500 prosocial activities.

Figure 3. Total prosocial activities provided by extra-large RCOs

ADVOCACY ACTIVITIES

- All three of the extra-large-sized RCOs provided an increased number of advocacy activities from SFY2022 to SFY2023. Specifically, Hope

Figure 4. Total advocacy activities provided by extra-large RCOs

for New Hampshire Recovery only provided two advocacy activities in SFY2022. In SFY2023, they provided 710 (35,400% increase). This is the largest increase of any of the RCOs (**Figure 4**).

- From SFY2022 to SFY2023, Revive Recovery Resource Center and SOS Recovery provided a 3.7% and .6% increase in the number of advocacy activities provided, respectively.

EDUCATIONAL ACTIVITIES

- Both Hope for New Hampshire Recovery and Revive Recovery Resource Center provided an increased number of educational activities from SFY2022 to SFY2023 (**Figure 5**).
- Hope for New Hampshire Recovery had the largest percentage increase (22,050% increase) in the number of educational activities provided from SFY2022 to SFY2023.
- There was a 51.2% decrease in the number of educational activities provided by SOS Recovery from SFY2022 to SFY2023.

Figure 5. Total educational activities provided by extra-large RCOs

RECOVERY PLAN GOALS

- Hope for New Hampshire Recovery was the only extra-large RCO in which participants completed an increased number of recovery plan goals from SFY2022 (n=94) to SFY2023 (n=143), resulting in a 52.1% increase.

Figure 6. Total completed goals by participants at extra-large RCOs

- The number of completed recovery plan goals by participants at SOS Recovery decreased from SFY2022 (n=463) to SFY2023 (n=101), which resulted in a 78.2% decrease (**Figure 6**).
- Although the total number of completed goals decreased from SFY2022 to SFY2023 at Revive Recovery Resource Center, the average number of completed goals per participant only decreased from 16.8 in SFY2022 to 15.8 in SFY2023.
